## Section 6: Accidental Release Measures

7736

**Personal precautions, protective equipment and emergency procedures**

**Personnel Precautions:** Evacuate area and keep unnecessary and unprotected personnel from entering the spill area.

#### Methods and materials for containment and cleaning up

**Methods for Containment:** Spills are very unlikely, because the wiper fabric has absorbed the liquid solvent solution. In the event of a spill, contain with an inert absorbent.

**Methods for Cleanup:** Absorb spill with inert material (e.g., dry sand or earth), then place in a chemical waste container. Provide ventilation. Clean up spills immediately observing precautions in the protective equipment section.

#### Environmental precautions

**Environmental Precautions:** Avoid runoff into storm sewers, ditches, and waterways. Comply with all government regulations on reporting releases.

### Section 7: Handling and Storage

7736

#### Precautions for safe handling

**Handling:** Use with adequate ventilation. Avoid breathing vapor, aerosol or mist.

**Work Practices:** Handle in accordance with good industrial hygiene and safety practices.

**Hygiene Practices:** Wash thoroughly after handling.

#### Conditions for safe storage, including any incompatibilities

**Storage:** Store in a cool, dry, well ventilated area away from sources of heat, combustible materials, and incompatible substances. Keep container tightly closed when not in use.

### Section 8: Exposure Controls/Personal Protection

7736

#### Exposure Guidelines

##### Appropriate engineering controls

**Engineering Controls:** Use appropriate engineering control such as process enclosures, local exhaust ventilation, or other engineering controls to control airborne levels below recommended exposure limits. Good general ventilation should be sufficient to control airborne levels. Where such systems are not effective wear suitable personal protective equipment, which performs satisfactorily and meets OSHA or other recognized standards. Consult with local procedures for selection, training, inspection and maintenance of the personal protective equipment.

##### Individual protection measures

**Eye Protection:** Safety glasses with side shields must be worn at all times. If splash hazard exists, wear chemical splash goggles and/or face shield.

**Face Protection:** Safety glasses with side shields must be worn at all times. If splash hazard exists, wear chemical splash goggles and/or face shield.

**Skin Protection:** Wear appropriate protective gloves and other protective apparel to prevent skin contact. Consult manufacturer's data for permeability data.

**Hand Protection:** Nitrile rubber or natural rubber gloves are recommended.

**Respiratory Protection:** Use a NIOSH/MSHA or European Standard EN 149 approved respirator if exposure limits are exceeded or if irritation or other symptoms are experienced. Comply with the OSHA respirator regulations found in 29 CFR 1910.134 or European Standard EN 149. Use a positive pressure air supplied respirator if there is any potential for an uncontrolled release, exposure levels are not known, or any other circumstances where air purifying respirators may not provide adequate protection.

**Other Protective:** Facilities storing or utilizing this material should be equipped with an eyewash and a deluge shower safety station.

**Hygiene Practices:** Wash thoroughly after handling.
